

COMMUNITY SCIENCE SOILSHOP

Free Opportunity to Get Your Soil Tested for Lead

Collect Your
Soil Sample

Bring Your
Sample To One
of Our Events

Get Your
Results Onsite

WHEN
November 19, 2022
11 AM - 1 PM

WHERE
ELM FARM
380 Elm Street
Atlanta, GA 30314

Visit: linktr.ee/soilshop

Why Test Your Soil?

Soil can become contaminated with chemicals that are dangerous for humans, especially children. Screening your soil for lead (Pb) can help determine your family's level of exposure to lead and ways to reduce your exposure!

How Lead Impacts Your Health

In Children...

- Brain & nervous system damage
- Learning disabilities & attention deficiencies
- Speech & language problems
- Decreased muscle, bone growth & muscle coordination

In Adults...

- Pregnancy issues and reduced fertility in all adults
- Nerve disorders, memory and concentration issues
- High blood pressure
- Muscle and joint pain
